

CleanCut - Responsive Multi-Purpose HTML Template

The CleanCut template is a multi-purpose fully responsive website template that uses the latest web technologies - it supports landscape and portrait viewports on smartphones or tablets, as well as PC's, laptops and internet ready TV's.

The template is fully W3C conform and validated, the code base uses HTML5, CSS3 & the jQuery library.

This template can be used for a wide array of website types, including but not restricted to: personal & commercial portfolio sites, business & corporate sites, ecommerce / product catalogue, online marketing or service websites.

The template has a vast amount of layouts to choose from, meaning you can easily create a custom template by combining any of the homepages, page & blog layouts with each other - you can always use multiple variations.

The CleanCut template comes with over 100 valid page template files and it is all professionally documented.

The downloadable archive contains two "template" folders: "Full Template" & "Basic Template".

The full template has everything incorporated into it, whereas the basic template simply has the very basics to use the template as a base template, without having to remove tons of pre-defined HTML code.

The template comes with a choice of:

- Responsive - Full Width
- Responsive - Boxed
- Fixed Width - Full Width (960px or 1200px)
- Fixed Width - Boxed (960px or 1200px)
- Light or Dark Skin + Optional Custom Skin
- 8 Pre-defined colour schemes + Optional Custom Colours

Page layout types include:

- Standard - 1, 2, or 3 columns
- Portfolio - Grid 2 & 3 columns
- Gallery - Grid 2, 3, 4 & 5 columns and filterable
- Blog Overview - Grid 2 & 3 columns
- Blog Single

All of the above layouts come with the options of: Full Width, Sidebar Left, Sidebar Right, Sidebar Left & Right
